#### SECTION 4: FIRST AID MEASURES

---

**DESCRIPTION OF FIRST AID MEASURES:**

**GENERAL ADVICE:** Consult a physician. Show this safety data sheet to the doctor in attendance.

**IN CASE OF EYE CONTACT:**

Do not rub the eyes. Keep eyelids open. Immediately rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately get medical advice/attention.

**IN CASE OF SKIN CONTACT:**

Remove/take off contaminated clothing and shoes immediately. Wash with plenty of water and soap. If skin irritation or rash occurs, seek medical advice/attention. Wash contaminated clothing before reuse.

**IF INGESTED:**

Rinse mouth. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Keep patient warm with a blanket. Immediately get medical advice/attention. If vomiting occurs, push down the head so that the vomited matter from the stomach will not get into the lungs. If breathing is difficult, provide victim with oxygen. If not breathing, give artificial respiration.

**IF INHALED:**

Remove victim to fresh air and keep at rest in a position comfortable for breathing. If breathing is difficult, provide victim with oxygen. If not breathing, give artificial respiration. Rinse the nose, mouth, and throat with water. Keep patient warm with a blanket. Immediately get medical advice/attention. If vomiting occurs, push down the head so that the vomited matter from the stomach will not get into the lungs.

**MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED:**

**Eyes:** Splash of the liquid or concentrated vapors may cause severe eye irritation. Severe injuries may result from repeated or prolonged contact. Injuries to the eye may be permanent if not treated immediately.

**Inhalation:** Excessive exposure to vapors may be irritating to the nose, throat, upper respiratory tract and lungs. Excessive exposure can result in headaches, dizziness, nausea, and narcotic effects; it can be defined as inadequate ventilation for extended periods of time.

**Skin Contact:** Contact with hot product may cause thermal burns of varying degree. prolonged unprotected contact may cause redness, irritation to the skin, sensitivity, and dermatitis.

**Ingestion:** If swallowed, this product may cause vomiting, nausea, and diarrhea and may be harmful if swallowed in large amounts.

**INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT:**

Maintain adequate ventilation and oxygenation of the patient. May cause respiratory sensitization or asthma-like symptoms. Persons receiving significant exposure should be observed for 24-48 hours for signs of respiratory distress.

**SECTION 5: FIRE-FIGHTING MEASURES****SUITABLE EXTINGUISHING MEDIA:**

Use alcohol-resistant foam, dry chemical, carbon dioxide or dry sand.

**SPECIFIC HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE:**

Burning produces noxious and toxic fumes. Exposure to decomposition products may be a hazard to health.

**ADVICE FOR FIREFIGHTERS:**

Fight fire with normal precautions from a reasonable distance. Use water spray to cool unopened containers. Prevent fire extinguishing water from contaminating surface water or the ground water system. Use extinguishing measures that are appropriate to local circumstances and the surrounding environment

**SECTION 6: ACCIDENTAL RELEASE MEASURES****PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT, AND EMERGENCY PROCEDURES:**

Keep people away from and upwind of spill/leak. Ensure adequate ventilation. Avoid contact with skin and eyes. Wear suitable protective clothing, gloves, and eye/face protection.

**ENVIRONMENTAL PRECAUTIONS:**

Do not flush into surface water or sanitary sewer system.

**METHODS AND MATERIALS FOR CONTAINMENT AND CLEANING UP:**

Supplies of suitable decontaminant/commercial decontaminant should always be kept available. Contain and cover the spillage with inert absorbent (sand, earth, vermiculite, etc.) and decontaminant/commercial decontaminant. Leave to react for at least 30 minutes. Shovel residues into open-top drums and remove for further decontamination if necessary. Clean area with water and additional decontaminant/commercial decontaminant. Test atmosphere for vapors to ensure safe working conditions before other personnel are allowed in the area. Suitable decontaminant solution: Commercial solution or water 90-95%, concentrated ammonia solution 5-10%, liquid detergent 0.2-2%. Ventilate the area.

**SECTION 7: HANDLING AND STORAGE****PRECAUTIONS FOR SAFE HANDLING:**

Handle and open container with care. Use only adequate ventilation. Slacken off drum bungs before heating to prevent any pressure build up. Avoid contact with moisture and prolonged exposure to temperatures above 60°C (140°F). Purge open drums with nitrogen before resealing. Do not use spot heating devices such as band heaters or torches. Make sure contents are completely liquid and uniform before using.

**CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:**

Keep container tightly closed and in a dry, well-ventilated place. Store at room temperature in the original container. Keep under nitrogen. Isocyanate based products react with water liberating carbon dioxide, which can lead to excessive pressure in closed containers, and form solid insoluble polymers, which can block pipes, valves, etc. Contact with copper or copper alloys and galvanized surfaces must be avoided and valves made of these materials must not be used in equipment for storing and handling diisocyanates. Do not store in open containers. Damaged or punctured drums should be empty.

**SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION****CONTROL PARAMETERS:**

Components with Workplace Control Parameters: Contains no substance with occupational exposure limit values.

**EXPOSURE CONTROLS:**

Engineering Controls: Effective exhaust ventilation system. Ensure that extracted air cannot be returned to the workplace through the ventilation system. Ensure that eyewash stations and safety showers are close to the workstation location.

**Personal Protective Equipment:**

Eye/Face Protection:  
Skin Protection:

Safety glasses with side-shields.  
Handle with gloves. Gloves should be inspected before use. Solvent-resistant gloves (butyl-rubber) recommended. Remove gloves without touching skin. Dispose of contaminated gloves according to applicable laws. Wash and dry hands.

Respiratory Protection:

In the absence of engineering controls sufficient to maintain airborne concentrations below recommended occupational exposure limit values, appropriate respiratory protection should be utilized. Due to the poor warning properties regarding the chemical(s) of concern, negative pressure air purifying respirators are not recommended at any exposure level in excess of the exposure limit values.

Control of Environmental Exposure:

Do not let product enter drains.

Use personal protective equipment. Avoid breathing vapors, mist, or gas. Ensure adequate ventilation. Evacuate personnel to safe areas.

**ENVIRONMENTAL PRECAUTIONS:**

Do not let product enter drains.

**METHODS AND MATERIALS FOR CONTAINMENT AND CLEANING UP:**

Remove any sources of ignition and avoid prolonged breathing of vapor when performing any cleanup of spills. Ventilate the area. Absorb the spill by using an inert material (sand, earth, or vermiculate). Handle as a flammable asphalt material/liquid. Use proper disposal containers. Wear appropriate personal protection equipment for the handling of this material.

**EXPOSURE CONTROLS:****Engineering Controls:**

Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the work shift. Use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations. Provide general and/or local exhaust ventilation to control airborne levels below the exposure guidelines. Exhaust systems should be designed to move air away from source of vapor/aerosol generation and people working at this point. The odor and irritancy are inadequate to warn of excessive exposure.

**Personal Protective Equipment  
Eye/Face Protection:**

Wear anti-splash chemical goggles with side shields or wear a full face shield.

**SECTION 4: FIRST AID MEASURES**

---

**DESCRIPTION OF FIRST AID MEASURES:**

**GENERAL ADVICE:** Consult a physician. Show this safety data sheet to the doctor in attendance.

**IN CASE OF EYE CONTACT:**

Do not rub the eyes. Keep eyelids open. Immediately rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing. Immediately get medical advice/attention.

**IN CASE OF SKIN CONTACT:**

Remove/take off contaminated clothing and shoes immediately. Wash with plenty of water and soap. If skin irritation or rash occurs, seek medical advice/attention. Wash contaminated clothing before reuse.

**IF INGESTED:**

Rinse mouth. Remove victim to fresh air and keep at rest in a position comfortable for breathing. Keep patient warm with a blanket. Immediately get medical advice/attention. If vomiting occurs, push down the head so that the vomited matter from the stomach will not get into the lungs. If breathing is difficult, provide victim with oxygen. If not breathing, give artificial respiration.

**IF INHALED:**

Remove victim to fresh air and keep at rest in a position comfortable for breathing. If breathing is difficult, provide victim with oxygen. If not breathing, give artificial respiration. Rinse the nose, mouth, and throat with water. Keep patient warm with a blanket. Immediately get medical advice/attention. If vomiting occurs, push down the head so that the vomited matter from the stomach will not get into the lungs.

**MOST IMPORTANT SYMPTOMS AND EFFECTS, BOTH ACUTE AND DELAYED:**

**Eyes:** Splash of the liquid or concentrated vapors may cause severe eye irritation. Severe injuries may result from repeated or prolonged contact. Injuries to the eye may be permanent if not treated immediately.

**Inhalation:** Excessive exposure to vapors may be irritating to the nose, throat, upper respiratory tract and lungs. Excessive exposure can result in headaches, dizziness, nausea, and narcotic effects; it can be defined as inadequate ventilation for extended periods of time.

**Skin Contact:** Contact with hot product may cause thermal burns of varying degree. prolonged unprotected contact may cause redness, irritation to the skin, sensitivity, and dermatitis.

**Ingestion:** If swallowed, this product may cause vomiting, nausea, and diarrhea and may be harmful if swallowed in large amounts.

**INDICATION OF ANY IMMEDIATE MEDICAL ATTENTION AND SPECIAL TREATMENT:**

Maintain adequate ventilation and oxygenation of the patient. May cause respiratory sensitization or asthma-like symptoms. Persons receiving significant exposure should be observed for 24-48 hours for signs of respiratory distress.

---

**SECTION 5: FIRE-FIGHTING MEASURES**

---

**SUITABLE EXTINGUISHING MEDIA:**

Use carbon dioxide, dry chemical, or foam.

**SPECIFIC HAZARDS ARISING FROM THE SUBSTANCE OR MIXTURE:**

Carbon oxides, Nitrogen oxides (NOx)

**ADVICE FOR FIREFIGHTERS:**

Wear self-contained breathing apparatus for firefighting. Static accumulating liquid can become electrostatically charged even to bonded and ground equipment. Treat as a highly flammable fuel oil fire. Evacuate area and fight fire from a safe distance.

**EXPLOSION HAZARDS:** Vapors from this product may travel or be moved by air currents and ignited by pilot lights, other flames, smoking, sparks, heaters, electrical equipment, static, or other ignition sources at locations distant from product handling point.

---

#### SECTION 6: ACCIDENTAL RELEASE MEASURES

---

**PERSONAL PRECAUTIONS, PROTECTIVE EQUIPMENT, AND EMERGENCY PROCEDURES:**

Use personal protective equipment. Avoid breathing vapors, mist, or gas. Ensure adequate ventilation. Evacuate personnel to safe areas.

**ENVIRONMENTAL PRECAUTIONS:**

Do not let product enter drains.

**METHODS AND MATERIALS FOR CONTAINMENT AND CLEANING UP:**

Remove any sources of ignition and avoid prolonged breathing of vapor when performing any cleanup of spills. Ventilate the area. Absorb the spill by using an inert material (sand, earth, or vermiculate). Handle as a flammable asphalt material/liquid. Use proper disposal containers. Wear appropriate personal protection equipment for the handling of this material.

---

#### SECTION 7: HANDLING AND STORAGE

---

**PRECAUTIONS FOR SAFE HANDLING:**

Avoid contact with eyes and skin. Avoid breathing vapor. Wash thoroughly after handling. Use adequate ventilation. See section 2 for precautions.

**CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES:**

Keep container tightly closed and in a dry well-ventilated place. Avoid moisture and contamination of the stored product.

**EXPOSURE CONTROLS:**

<b>Engineering Controls:</b>	Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the work shift. Use only with adequate ventilation. Local exhaust ventilation may be necessary for some operations. Provide general and/or local exhaust ventilation to control airborne levels below the exposure guidelines. Exhaust systems should be designed to move air away from source of vapor/aerosol generation and people working at this point. The odor and irritancy are inadequate to warn of excessive exposure.
<b>Personal Protective Equipment</b>	
<b>Eye/Face Protection:</b>	Wear anti-splash chemical goggles with side shields or wear a full face shield.
<b>Skin Protection:</b>	Handle with gloves and boots suitable for this material. Gloves and boots should be inspected before use. Remove gloves without touching skin. Dispose of contaminated gloves according to applicable laws. Wash and dry hands.
<b>Respiratory Protection:</b>	When atmospheric levels go above guideline, wear an air purifying respirator equipped with an organic vapor sorbent and a particle filter. Use a positive-pressure air supplying respirator when the atmospheric levels exceed guideline limits beyond the effective use of an air purifying respirator.
<b>Control of Environmental Exposure:</b>	Do not let product enter drains.
